### **APPLICATIONS BUILT**

#### **Music Event Search**

- A search engine for upcoming music events and concerts in your area. Presents users with an interface that searches for and displays artists (as well as similar artists) performing live in the area.
- Full Stack Developer
- <https://github.com/stephenrs6/Music-Event-Search>

#### **Rating Reader**

- An app with database that stores ratings and reviews for anything one desires. Has user account register and login functionality. Can search for reviews based off of category, item name, or username.
- Full Stack Developer
- <https://github.com/stephenrs6/rating-reader>

#### **Train Scheduler**

- Similar to a jumbotron at the train station, this application incorporates Moment.js and a simple database to host arrival and departure data. Provides up-to-date information about various trains. Users may enter additional trains to track..
- <https://stephenrs6.github.io/Crystals-Collector/>

#### **Gem Collector**

- A simple Javascript game. Players collect different colored gems of different unknown values, and attempt to match a predetermined value to win.
- <https://stephenrs6.github.io/Gem-Collector>
