An intensive 12-week long full-time program dedicated to designing and building web applications. Skill learned include HTML5, CSS3, Javascript, JQuery, Bootstrap, Handlebars, Firebase, MySQL, MongoDB, Express.js, React.js, Node.js, Git and Heroku.

University of California, San Diego, La Jolla, CA   June 2016
B.A. Psychology (Business Minor)

APPLICATIONS BUILT

Knotify
- A live music event searcher made for connoisseurs of live music acts. Presents users with an interface that searches for and displays music acts performing live in the area, as well as similar acts. For each result, a visual graphic is shown in a carousel slideshow with show information such as date, time, location, and links to purchase tickets.
- Full Stack Developer
- https://bharloe.github.io/Music-Event-Search/

Geography Trivia Game
- Short trivia on geography. User is presented with trivia questions to answer before a timer is up, after which the results are displayed.
- Full Stack Developer
- https://stephenrs6.github.io/TriviaGame/

Crystals Collector Game
- A game where users collect various crystals of varying values in order to match the exact value requested. Upon going over predetermined value, the game will end in a loss and a new value will be assigned.
- Full Stack Developer
